08/2021 – present TERRELL, TX

Automotive glass and accessory installation/repair

1. Trained in Laredo, TX and formed LLC in 2021.

Projects

"OpenBook" an appointment scheduling app (in house API routes)

1. Developed backend using Node, Express, MongoDB, jwt, bcrypt, etc.
2. API endpoints for backend, jwt token for user verification.
3. NoSQL - MongoDB/Mongoose with axios/React/Material UI

"consoleLog" a tech blog app (in house API routes)

1. Created login/logout/signup functionality with vanilla js (no user verification, but express session was created).
2. Npm, 'file-uploader', was used to create a base64 image stored on the database.
3. Users upload an image stored as a text string.
4. SQL with Sequelize was used with async/await and Bootstrap for frontend

"StreetNutrients" a recipe/nutrient app (3rd party API routes)

1. Vanilla JavaScript, Materialize for UI, APIs were 'edamam' (recipes) and 'usda.gov' (ingredients/nutritional info)
2. Local Storage used to store basically everything lol.

Education
